

## Policy for the future:

The Takasago Group is deeply aware of the fact that our business activities depend on and affect ecosystem, and we will conserve biodiversity in order to realize a sustainable society.

- engage in management that takes conservation into consideration.
- continuous improvement in procurement of raw materials
- develop and improve technologies, products, and processes for conservation of ecosystems and biodiversity
- cooperation with internal and external stakeholders

## <Examples of initiatives>

### ■ Takasago Sustainability Key Initiatives, “TaSuKI”

The Takasago Group is promoting the Takasago Global Procurement Sustainability Key Initiatives (TaSuKI) to manage the procurement of key strategic raw materials while meeting the expectations of stakeholders with regard to sustainability. We are directly involved in local environmental conservation activities based in the country of origin, such as a grapefruit tree-planting project in Florida and a reforestation project in Madagascar, a vanilla-producing region, to ensure that our procurement activities take biodiversity into consideration.

### ■ RSPO certification

The Takasago Group has been a member of the Roundtable on Sustainable Palm Oil (RSPO) and acquired supply-chain certification at our manufacture sites to promote a sustainable palm supply chain. We will respond to the Shared Responsibility set by the RSPO and expand consumption of certified palm products.

## <Future issues>

Since establishment, the Takasago Group’s success has been supported by various benefits from biodiversity. Therefore, our group promotes the conservation of biodiversity as one of the most important issues.

## <Message for society>

Based on the “Care for People, Respect the Environment” statement in our Vision 2040, the Takasago Group respects all kinds of values and aims to live in coexistence with nature. Through fair and transparent corporate activities, we will continue to address social issues and contribute to sustainability in all forms.
