

## Policy for the future:

GNI Group, as a global healthcare company, is committed to bringing new hope to patients around the world. Our mission is to address unmet medical needs (medical needs for diseases without effective treatments) while fulfilling our social responsibility through our business activities, thereby contributing to the enhancement of sustainability.

## <Examples of Specific Initiatives>

### ISO14001 Certification at Beijing Continent

Beijing Continent holds a certificate for the Environmental Management System Standard ISO14001 (Chinese name: GB/T24001) and continuously invests in environmental protection, aiming to reduce harmful emissions and waste management at its factories.

### Improving Quality of Life for Fibrosis Patients

We are developing treatment drugs in the field of fibrosis, an unmet medical need, contributing to the improvement of the quality of life (QOL) for the increasing number of patients.

### Donations to NPOs

Beijing Continent donates ETUARY (a treatment drug for pulmonary fibrosis) to Chinese NPOs (non-profit organizations) and has increased these donations by 26.6% as of December 2023 compared to the same period in the previous year.

### Ensuring the Quality of Biomaterials

BAB Corporation holds ISO13485:2016 certification, an international standard for quality management in the medical device industry, ensuring the provision of safer biomaterials.
